

## Current Service Learning Projects 2025-2026

Project Summary by Year				
		2024-2025 (funded)	2025-2026	
	Schools	61	49	
	Ready-to-Gos	75	70	
	Homegrown	37	21	
	<b>Total</b>	<b>112</b>	<b>91</b>	
Parish, State	School	Project Title	Description	Subjects
Jefferson, LA	Academy of Our Lady High School	Homegrown: Bringing Joy to Elders	Students learn about the needs of the elderly at Our Lady of Wisdom and prepare activities to provide companionship and assistance to the elders	Religious Studies
Orleans, LA	Andrew Wilson Charter	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	Andrew Wilson Charter	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	STEM
Jefferson, LA	Archbishop Chapelle High School	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science, Social Studies
Jefferson, LA	Archbishop Chapelle High School	RTG: LOOP NOLA	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Science, Social Studies
Jefferson, LA	Archbishop Chapelle High School	RTG: Woodlands Conservancy	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Orleans, LA	Benjamin Franklin Elementary School	RTG: Understanding Homelessness	Students will receive instruction about homelessness and household budgeting before selecting one of the following service actions: donation drive or multipurpose cleaning product creation.	Math, Financial Literacy, Social Studies
Orleans, LA	Benjamin Franklin Elementary School	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	Benjamin Franklin Elementary School	RTG: Woodlands Conservancy	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Orleans, LA	Benjamin Franklin Middle School	RTG: Woodlands Conservancy	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Orleans, LA	Benjamin Franklin Middle School	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	Benjamin Franklin Middle School	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	Benjamin Franklin Middle School	RTG: LOOP NOLA	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Science, Social Studies
Orleans, LA	Bishop McManus Academy	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	Bricolage Academy	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Jefferson, LA	Bridgedale Elementary School	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Lafourche, LA	Central Lafourche High School	RTG: Woodlands Conservancy	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Jefferson, LA	Chateau Estates Elementary School	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science, Social Studies
St. Charles Parish	Destrehan High School	Homegrown: STEM-lementary	High school students promote STEM education at Norco Elementary School through Robotics	Science, Math

Ascension, LA	<b>Dutchtown Middle School</b>	Homegrown: A Cup of Thanks	Students with disabilities are taught the basics of customer service and apply their skills by providing a coffee cart service to teachers, special education staff, the Ascension Parish Sheriff's Office.	Math, ELA, Social Studies
Jefferson, LA	<b>East Jefferson High School</b>	RTG: Common Ground	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts such as: removing invasive species, maintaining previously planted trees and grasses, weeding and potting trees, planting seeds, mulching pots or compost, and/or picking up trash or recycling.	Science
Jefferson, LA	<b>East Jefferson High School</b>	RTG: Woodlands Conservancy	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Orleans, LA	<b>Ecole Bilingue De La Nouvelle-Orléans</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Orleans, LA	<b>Edna Karr High School</b>	RTG: Common Ground	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts such as: removing invasive species, maintaining previously planted trees and grasses, weeding and potting trees, planting seeds, mulching pots or compost, and/or picking up trash or recycling.	Science
Orleans, LA	<b>Edna Karr High School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
St Tammany, LA	<b>Fifth Ward Junior High School</b>	Homegrown: Poultry and Plants	Students learn to raise baby chicks and the eggs are donated to low income families in the Bush and Sun communities.	STEM
Terrebone, LA	<b>Grand Caillou Middle School</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Terrebone, LA	<b>Grand Caillou Middle School</b>	RTG: Understanding Homelessness	Students will receive instruction about homelessness and household budgeting before selecting one of the following service actions: donation drive or multipurpose cleaning product creation.	Math, Financial Literacy, Social Studies
Jefferson, LA	<b>Hazel Park/Hilda Knoff Elementary School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Jefferson, LA	<b>Hazel Park/Hilda Knoff Elementary School</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Orleans, LA	<b>Homer Plessy Elementary School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>Homer Plessy Middle School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>International School of Louisiana- Uptown Campus</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	<b>International School of Louisiana- Uptown Campus</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Jefferson, LA	<b>John Curtis Christian School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science, Social Studies
Orleans, LA	<b>John F. Kennedy High School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>John F. Kennedy High School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	<b>John F. Kennedy High School</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies

Jefferson, LA	<b>John Q Adams Middle School</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Jefferson, LA	<b>Kehoe- France School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Jefferson, LA	<b>Kehoe- France School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Jefferson, LA	<b>Kehoe-France School</b>	RTG: LOOP NOLA	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Science, Social Studies
Orleans, LA	<b>Louise S. McGehee School</b>	Homegrown: Sophomores Reflect on the American Dream	Sophomores explore the concept of the "American Dream" throughout history, as they visit agencies assisting the homeless, and consider the factors preventing one from achieving the "American Dream".	ELA
Orleans, LA	<b>Louise S. McGehee School</b>	Homegrown: Juniors Study Government Policy & Nonprofits	Students investigate government housing policies and homelessness, as they work with Habitat for Humanity.	Social Studies
Orleans, LA	<b>Lycée Français de la Nouvelle-Orléans</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>Martin Behrman Charter School</b>	RTG: Understanding Homelessness	Students will receive instruction about homelessness and household budgeting before selecting one of the following service actions: donation drive or multipurpose cleaning product creation.	Math, Financial Literacy, Social Studies
Jefferson, LA	<b>Metairie Park Country Day School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	<b>Mount Carmel Academy</b>	Homegrown: Hands helping hands	Students learn about blight and assist low-income homeowners with repairs to their homes.	Religious Studies
Orleans, LA	<b>New Harmony High School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>New Harmony High School</b>	RTG: Woodlands Conservancy	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Orleans, LA	<b>New Harmony High School</b>	RTG: Common Ground	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts such as: removing invasive species, maintaining previously planted trees and grasses, weeding and potting trees, planting seeds, mulching pots or compost, and/or picking up trash or recycling.	Science
Orleans, LA	<b>New Harmony High School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	<b>New Orleans Science &amp; Math High School</b>	Homegrown: Solar Generators for the Community	Students will build six solar powered generators for use as part of disaster relief.	STEM
Tangipahoa, LA	<b>Ponchatoula High School</b>	Homegrown: Restoring Honor to American Veterans	Students with disabilities learn about American history, citizenship, and military service before visiting a center providing transitional services to homeless veterans.	Math, English/Language Arts, Social Studies, Vocational Instruction
Orleans, LA	<b>Rooted School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	<b>Rooted School</b>	RTG: Understanding Homelessness	Students will receive instruction about homelessness and household budgeting before selecting one of the following service actions: donation drive or multipurpose cleaning product creation.	Math, Financial Literacy, Social Studies
Orleans, LA	<b>Rooted School</b>	RTG: Understanding Homelessness	Students will receive instruction about homelessness and household budgeting before selecting one of the following service actions: donation drive or multipurpose cleaning product creation.	Math, Financial Literacy, Social Studies
Jefferson, LA	<b>Rudolph Matas Elementary</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies

Orleans, LA	<b>St Mary's Dominican High School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
Lafayette, LA	<b>St Thomas More Catholic School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
Jefferson, LA	<b>St. Angela Merici School</b>	Homegrown: 7th Graders CAN make a Difference	Students learn about hunger and budgeting before preparing and serving lunches at Lantern Light.	Math, Religious Studies
Jefferson, LA	<b>St. Angela Merici School</b>	Homegrown: 6th Literacy Builders	Students provide literacy support and donations to struggling readers.	English
Jefferson, LA	<b>St. Angela Merici School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>St. Benedict the Moor School</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>St. Benedict the Moor School</b>	RTG: Understanding Homelessness	Students will receive instruction about homelessness and household budgeting before selecting one of the following service actions: donation drive or multipurpose cleaning product creation.	Math, Financial Literacy, Social Studies
St. John the Baptist	<b>St. Charles Catholic High School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
Jefferson, LA	<b>St. Elizabeth Ann Seton School</b>	RTG: Our Wetlands, Our Responsibility	Students study the wetlands before assisting with preserving animal habitats and replenish wetlands damaged by hurricanes and human interactions.	English, Science
Jefferson, LA	<b>St. Elizabeth Ann Seton School</b>	RTG: Sixth Graders Teach about Butterflies	Sixth graders study the monarch butterfly and host a butterfly fair for first graders at another school.	Science, Technology, Art, English
Orleans, LA	<b>Sts. Leo-Seton Catholic School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
East Baton Rouge, LA	<b>St. Lillian Academy</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
St. Tammany	<b>St. Scholastica Academy</b>	Homegrown: Community garden	Science students explore food insecurity, grow vegetables using a robot, and deliver fresh produce to a food bank.	Science, Agriculture
East Baton Rouge, LA	<b>The Brighton School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
Orleans, LA	<b>The NET: Central City High School</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Orleans, LA	<b>The NET: Gentilly High School</b>	RTG: Understanding Homelessness	Students will receive instruction about homelessness and household budgeting before selecting one of the following service actions: donation drive or multipurpose cleaning product creation.	Math, Financial Literacy, Social Studies
Orleans, LA	<b>The NET: Gentilly High School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies
Orleans, LA	<b>The NET: Gentilly High School</b>	RTG: LOOP NOLA: 1 of 2	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Orleans, LA	<b>The NET: Gentilly High School</b>	RTG: LOOP NOLA: 2 of 2	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Orleans, LA	<b>The Willow School</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Orleans, LA	<b>The Willow School</b>	RTG: Coalition to Restore Coastal Louisiana	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts by bagging oyster shells into mesh bags in preparation for reef construction.	Science, Social Studies

Orleans, LA	<b>The Willow School</b>	RTG: Common Ground	Students will learn about the Louisiana coastal land loss crisis while aiding in restoration efforts such as: removing invasive species, maintaining previously planted trees and grasses, weeding and potting trees, planting seeds, mulching pots or compost, and/or picking up trash or recycling.	Science
Orleans, LA	<b>The Willow School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
Orleans, LA	<b>The Willow School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
Orleans, LA	<b>Ursuline Academy</b>	Homegrown: Empathy for change	Ursuline Juniors partner with a food bank to learn about food insecurity and homelessness before hosting a school food drive and serving lunch at area shelters.	Religious Studies
Orleans, LA	<b>Ursuline Academy</b>	Homegrown: Seniors Address Coastal Restoration	Seniors and seventh graders learn about Louisiana ecosystems before assisting with reforestation shoring up the coast.	Science, Religious Studies
Orleans, LA	<b>Ursuline Academy</b>	Homegrown: Aspirational Art	Art students will meet with a Grace House representative to learn about substance abuse and create 12-step journals for each resident to use in therapy or during meditation.	Visual Arts
Orleans, LA	<b>Ursuline Academy</b>	RTG: LOOP NOLA	Students will learn about issues facing Louisiana water systems such as invasive species and pollution, followed by a field trip to LOOP NOLA to engage in invasive species and pollution removal activities.	Science, Social Studies
Orleans, LA	<b>Ursuline Academy</b>	Homegrown: Journey with the Saints	Ursuline students create a small festival for students at special needs parochial school to share their knowledge of history of the Saints.	Religious Studies
Orleans, LA	<b>Ursuline Academy</b>	Homegrown: The Wonder Lab	Ursuline students take photographs to inspire awe and wonder to create an exhibit for 3rd graders at Louisiana Children's Museum	Religious Studies
Orleans, LA	<b>Ursuline Academy</b>	Homegrown: Thrive Guide	Students learning about navigating adult responsibilities (e.g. laundry) will work with DePaul clients transitioning out of temporary housing	Adult Responsibility, Psychology
Orleans, LA	<b>Ursuline Academy</b>	Homegrown: Sewing for Service	Students learn about health challenges faced by the elderly and create fidget quilts for a senior services' participants.	Visual Arts, Religious Studies
Orleans, LA	<b>Ursuline Academy</b>	RTG: Woodlands Conservancy- 1 of 2	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Orleans, LA	<b>Ursuline Academy</b>	RTG: Woodlands Conservancy- 2 of 2	Students will learn the part that forested wetlands play in storm mitigation and will be planting native trees in a designated restoration area.	Science, Social Studies
Orleans, LA	<b>Ursuline Academy (Lower School)</b>	RTG: M.E.S.S. Lab	Students study the concept of "Reduce, Reuse, and Recycle" and participate in a paint recycling project.	Math, English, Science, Social Studies
Orleans, LA	<b>Warren Easton High School</b>	Homegrown: RIFF (Reading is Fundamentally Fun)	High school English and Educator Pathways students will provide tutoring to struggling readers.	ELA, Career Training
Orleans, LA	<b>Warren Easton High School</b>	Homegrown: YRNO/STEM Students Building Together	After studying engineering fundamentals in the classroom, students will receive hands-on building experience while rehabbing blighted properties.	STEM, Engineering, Math
West Feliciana, LA	<b>West Feliciana High School</b>	RTG: LSU Coastal Roots	Students learn about coastal erosion and contribute to defense and restoration projects.	Science
