Ready-to-Go (RTG) Curriculum

August 25, 2026

Dear Service Learning Program Teachers,

We are pleased to announce that the current version of the Ready-to-Go (RTG) Curriculum is now open and available for use. Teachers participating in the Service Learning Program (SLP) may begin implementation immediately using these established materials.

Please note that an expanded and revamped version of the RTG Curriculum is currently in development and is nearing completion. This updated Expansion will be released once it has been fully finalized and reviewed. In the meantime, we ask that you continue to use the established RTG materials as the foundation for your SLP implementation.

We anticipate releasing the updated Expansion RTG Curriculum by the end of September. We will notify all SLP teachers as soon as it becomes available, along with guidance on transitioning any in-progress lessons.

Thank you for your continued partnership and flexibility as we work to bring you the best possible curriculum resources.

Sincerely,

Jestin Moorehead

Director of Programming
STEM Library Lab
