READY-TO-GO SERVICE LEARNING PROJECTS

Ready-to-Go (RTG) projects are fully funded, pre-packaged service learning projects developed by STEM Library Lab for schools in the Greater New Orleans area. RTG applications are one page and require a brief but mandatory orientation for the teacher overseeing the project.

The service component has been paired with relevant classroom curriculum and aligned with Louisiana student standards. RTG partnerships have been developed with multiple service organizations for the 2024-2025 school year. Please share this information with your school administration and colleagues. More information is available [here](#).
